PROFESSIONAL SUMMARY

Product Manager and former Product Owner with 11+ years of professional experience across customer support, quality assurance, product ownership and software development. Skilled at turning business needs into clear requirements, documenting processes and troubleshooting issues in close cooperation with developers, QA and business stakeholders. Experienced in working in English with international customers and teams.

KEY SKILLS

Requirements and documentation: requirements gathering, user journeys, process documentation, QA documentation (Google Docs)
Troubleshooting and quality: technical support, customer issue resolution, quality assurance, analysis of funnel and product issues
Product: product strategy and discovery, funnel metrics, analytics, SEO, customer journey design
Tools: Jira, ClickUp, Figma, Canva, Photoshop, GitHub Copilot, Codex, Bolt
Technical: C#, JavaScript, TypeScript, React, SQL, Unity

PROFESSIONAL EXPERIENCE

Product Manager | Your Crayon Story — Jun 2025 – Present

- Led a SaaS product from concept to launch in a two-person team, building the application from scratch.
- Designed the full customer journey from landing page to payment and delivery; simplified the personalization flow (pick a story, then enter the child's name, age and a personal dedication) and introduced a visual-preview product page.
- Defined funnel metrics (CTA-to-creation, personalization completion, story generation success, preview-to-checkout, purchase completion) and defined activation as receiving the personalized story.
- Validated the early customer journey through qualitative feedback, as traffic was too low for large-scale A/B tests.

Unity Game Developer (Freelance) | The Sixth Hammer — Nov 2022 – Sep 2024

- Developed game features in Unity and C#, working from tasks assigned and tracked in ClickUp.
- Maintained part of the project documentation.

Career break: full-time parent — Oct 2018 – Oct 2022

Social Media and Community Manager | Airstage — Sep 2017 – Sep 2018

- Managed social media and community in an early-stage startup.
- Acted as the point of contact and mediator between the company owner and the team (one software engineer, one QA engineer); tracked work in Jira and contributed to documentation.

Affiliate Marketing Manager / Product Owner | Purify Digital — May 2015 – Aug 2017

- Managed affiliate partnerships.
- Served as Product Owner for about a year on an app discovery platform, working directly with the software engineer and project management to decide what to include in the app.

Customer Success, QA and Training | 411 Locals (company of about 150 people) — Jan 2010 – May 2015

Customer Service QA — Sep 2013 – May 2015

- Quality assurance for customer service; wrote and maintained all QA documentation in Google Docs.

Corporate Trainer — 2013 (1 month)

- Trained a team in the Philippines.

Sales QA — May 2013 – Aug 2013

- Reviewed sales calls for quality and compliance with standards.

Customer Service Representative — May 2011 – May 2013

- Supported English-speaking customers in the US, resolving their questions and issues.

Technical Support Specialist — Jan 2011 – May 2011

- Diagnosed and resolved technical issues for English-speaking customers in the US.

SEO Specialist — Jan 2010 – Dec 2010

EDUCATION AND TRAINING

Front-End Engineer career path | Codecademy (self-directed) — Sep 2024 – Jun 2025
BS in Business Administration and Marketing | City University of Seattle
Diploma in Mathematics and Computer Science | High School of Mathematics, Varna
Certifications: Design Fundamentals; UX Design; Premiere Pro Video Processing; Unity Essentials; Unity 3D Basics
Languages: Bulgarian (native); English (fluent, C1; studied at a US university, 5+ years serving US customers)
